

PROFESSIONAL SUMMARY

Technical Product Manager and **Project Delivery Lead** with **2+ years** delivering AI, web and mobile products from requirements through launch. Delivered **13 consumer applications (11 live on Google Play with 7M+ Android downloads)** and B2B SaaS; led **teams of 4-10** across scope, backlog, sprint planning, QA/UAT and release. Experience includes **AI voice agents, CRM and healthcare API integrations, workflow automation, LLMs, n8n and LangChain**. B.Tech in Computer Science and Engineering from **IIIT Pune**.

EXPERIENCE

Founder & Project Lead <i>BraiInIt</i>	Sep 2025 – Present <i>Nagpur, MH, India</i>
- Built and deployed AI solutions for business workflows, including outbound calling systems with CRM integration for SwiftLeads AI and bilingual receptionists for Coredina AI. - Led delivery of B2B SaaS platforms Prosper AI and Squint AI (approximately \$10K projects), coordinating stack selection, AI voice-agent deployment, healthcare API integrations and automated manufacturing workflows. - Led end-to-end product delivery for 13 consumer applications, including CricScore (5M+ downloads) and Dhurina (1M+ downloads), taking products from requirements through launch and achieving a 4.6-star average rating. Additional Portfolio: Rollout AI (Website Builder), MeisterTask (Enterprise PM SaaS), Drop Taxi (Ride-Hailing Mobile App), HabTok (Social Media), ePlant (AI Identifier).	
Co-Founder, Project & Delivery Lead <i>AIPOOOL</i>	Oct 2024 – Sep 2025 <i>Pune, MH, India</i>
- Owned end-to-end delivery of an AI WhatsApp chatbot SaaS for bookings and appointments, delivering a \$7K MVP within agreed cost, timeline and quality targets. - Translated client needs into product specifications, QA checklists and acceptance criteria aligned with client SLAs, working directly with clients across Saudi Arabia, the US, UAE and Germany. - Evaluated and onboarded hosting, messaging API and field-execution partners based on cost, reliability and support SLAs.	
Software Development Intern <i>Futures First</i>	Oct 2023 – Mar 2024 <i>Hyderabad, MH, India</i>
- Engineered a responsive commodities-trading platform UI with seamless order routing and Lightstreamer Messaging Broker integration for market data streams, boosting user engagement by 30% and data streaming efficiency by 40%. - Leveraged Amazon EC2 Instance Store for secure order management, reducing order execution time by 25%, improving efficiency by 30%, and achieving 99.9% uptime.	
Associate AI Trainee <i>Scale AI</i>	Oct 2023 – Mar 2024 <i>Remote</i>
Contributed to LLM pre-training and RLHF with 88% accuracy, refashioned 500+ model prompts to yield a 32% improvement, elevated Human-AI interaction by 59%, and optimized SQL data analysis accuracy to 76%.
